

# **IFCM CYPRUS LIMITED**

## **Risk Disclosure and Warning Notice**

December 2020  
Version 1.0.1

## **RISK DISCLOSURE AND WARNING NOTICE**

The present Risk Disclosure and Warning Notice (hereinafter, the "Notice") is provided to you (our Client and prospective Client) in compliance to the Provision of Investment Services, the Exercise of Investment Activities, the Operation of Investment Advice and Other Related Matters Law 87(I)/2017, as subsequently amended from time to time ("the Law"), which is applicable to IFCM Cyprus Ltd ("the Company").

All Clients and prospective Clients should read carefully the following Notice contained in this document, before proceeding to purchase any financial services from the Company. However, it is noted that this document cannot and does not disclose or explain all of the risks and other significant aspects involved in the Services offered by the Company. The Notice was designed to explain in general terms the nature of the risks involved when dealing in Financial Instruments on a fair and not misleading basis.

Risk can never be eliminated, buying or selling financial instruments may result in the loss of part or all of your invested funds. The Company provides no guarantees of profit or of avoiding losses. The Company cannot, promise any specific level of performance or promise that a Client's investment decisions, strategies, will be successful/profitable. Clients have not received such guarantees from the Company or from any of its representatives. The Company's insolvency or default, may lead to positions being liquidated or closed out without the Client's consent and as a result the Client may suffer losses.

It is also important to remember that risk and reward generally go hand-in-hand. The more risk taken, the higher is the potential reward or loss. Conversely, the lower the risk, the lower the return or loss. Investors need to ask themselves how comfortable they would be facing a short-term loss in order to have the opportunity to make long-term gains. The important thing to remember is that, even if an investment goes down, a loss will only actually be made if it is redeemed at that time. A fall in investment value is only a paper loss until the investment is sold.

Clients are aware of the risks inherent in trading in Financial Instruments and are financially able to bear such risks and withstand any losses incurred. The Client acknowledges and accepts that there may be other additional risks apart from those mentioned above.
